devlabs.dev

I design and build **agentic AI systems and automation architectures** — from autonomous multi-agent pipelines and RAG systems to full-stack AI-native products that ship to production.

With **17+ years in full-stack development** and a track record at US-based startups, I specialize in mapping business processes end-to-end, identifying where AI creates real leverage, and executing — from technical blueprint to deployed system. Clients get a partner who thinks in outcomes, not tickets.

WHAT I DO

Agentic AI Systems

Autonomous multi-agent workflows using Claude, OpenAI, CrewAI and MCP. Tool use, memory, RAG pipelines, and human-in-the-loop logic — production-ready.

Process Design & Automation

End-to-end workflow audits: map ops, identify bottlenecks, design scalable automated systems — n8n, Make, APIs, LLMs, document parsing, SaaS integrations.

AI-Native Product Architecture

Full-stack AI products from scratch — Next.js + NestJS + LLM APIs + vector DBs. Technical blueprint, architecture, and execution in one engagement.

Technical AI Strategy

AI readiness audits, stack & model selection, token cost optimization, and architecture standards for teams going AI-first from the ground up.

LLM SYSTEMS

- Claude
- OpenAI
- Gemini
- Prompt Engineering
- Token Management
- RAG Pipelines
- Vector DBs
- Embeddings

AGENT ORCHESTRATION

- CrewAI
- LangChain
- LlamaIndex
- MCP Servers
- Claude Code
- Multi-agent workflows
- Human-in-the-loop

PROCESS & AUTOMATION

- n8n
- Make
- Zapier
- Workflow design
- Document parsing
- SaaS integrations
- API + Webhooks

BACKEND & DATA

- NestJS
- Node.js
- Python
- PostgreSQL
- MongoDB
- REST
- GraphQL
- Notion
- Airtable

FRONTEND & INFRA

- Next.js
- React
- TypeScript
- AWS
- Docker
- Vercel
- CI/CD
- GitHub Actions

LEADERSHIP

- Tech Lead 6yr
- Systems thinking
- Process design
- Ops consulting
- Remote teams
- US clients

“We have worked with DevLabs for over a year and a half, and we created a great product for fertility treatments — serving thousands of patients across the US. I truly recommend DevLabs for your projects. They have an amazing team!

Joshua Sams

CTO · Sama Fertility — San Francisco, CA

“As our React & React Native Tech Lead, Javi demonstrated exceptional technical expertise and leadership. Their enthusiasm for AI technologies consistently pushed our team to innovate. Javi would be a valuable asset to any forward-thinking tech organization.

Fabian Firpo

Product Augmented Designer · Securitize

“Javi is an expert at his craft. He's an incredible developer that also has great knowledge of design and overall product development. I am extremely thankful to have worked with him — and even more important, to call him a friend and advisor.

Alex P.

CFO · REQUORDIT

“Javier and I worked closely together building React Native mobile apps. He was extremely diligent, hard working, and delivered with high quality. He was a pleasure to work with. I highly recommend working with Javier!

Jasmine Slivka

Product-focused Entrepreneur · Manager

“Javi was one of the first developers at our company. He led our recruitment process, helped build our team, and the majority of that talent is still with us today. Always available to give the knowledge needed to move forward.

DevLabs

ROSARIO, ARGENTINA

2022 - Present

Founder & Technical Lead

STARDEVs LLC · devlabs.dev · AI-FIRST SOFTWARE CONSULTANCY

AI-first software consultancy — process audits, agentic architecture, and production-ready AI systems for startups and growing companies.

- Built AI quoting agent (Claude) for a marble & stone company: reads architectural floor plans, applies 30+ business rules, auto-generates PDF + Excel quotes — cutting quote time from 3hrs to minutes and recovering 70% of leads previously lost to tedious manual intake forms.
- Architected 20-module government platform modernization (NestJS + Next.js + PostgreSQL + MinIO) replacing a legacy Java/IE11 system serving a national library network.
- Delivered AI-native full-stack products for US clients across healthtech, fintech, and Web3 — from technical blueprint to deployed production system.

Technical Strategy

Sama Fertility

SAN FRANCISCO, CA

Dec 2022 - Present

Full-Stack Tech Lead

INDEPENDENT CONTRACTOR

Leading architecture and product development for a US fertility care platform connecting 10k+ patients with remote clinical care across US clinics.

- Designed full system architecture from scratch — web + mobile — defining technical specs directly with CTO across a 2+ year engagement.
- Introduced AI-assisted tooling and automated dev workflows, increasing team throughput by ~35% without adding headcount.
- Shipped CI/CD pipelines that cut deployment cycle time from days to under 2 hours.
- Led distributed 4-person frontend team across US/LATAM time zones — sprint planning, code reviews, delivery ownership.

React Native

SAN FRANCISCO, CA

Apr 2022 - Nov 2022

React / React Native Sr. Full-Stack

INDEPENDENT CONTRACTOR

Built and maintained web and mobile features for a digital securities platform tokenizing traditional financial instruments.

- Developed new features across marketing site, web app, and mobile.
- Integrated Framer CMS with React for marketing pages.
- Released iOS and Android apps to stores and coordinated with US/Spain stakeholders.

React Native React.js MERN Framer CMS CI/CD

Nifty Gateway

SAN FRANCISCO, CA

Nov 2020 - Jun 2021

React Native Sr. Full-Stack

INDEPENDENT CONTRACTOR

Developed cross-platform features for a leading NFT marketplace — Web, TV, and Mobile — within a fast-moving crypto/Web3 product team.

- Built UI across web, TV, and mobile using React Native and ReNative.
- Led code refactoring of React Native core and native modules.
- Designed and shipped CI/CD pipelines for multi-platform releases.

React Native ReNative Web3 CI/CD

Presence / Bluon / Foxbox

SAN FRANCISCO · CHICAGO

Feb 2017 - Oct 2020

React Native Tech Lead

INDEPENDENT CONTRACTOR

5+ years leading React Native development and mobile architecture across multiple US clients — from digital product agencies to B2B SaaS in HVAC and agriculture.

- Designed Git Flow strategies and CI/CD pipelines for mobile app releases on 4+ products.
- Released and maintained Android and iOS apps to stores across all projects.
- Acted as tech lead, architecture owner, and client-facing point of contact for US stakeholders.
